About Mozon
Technologies

2002

Founded Year

Its roots go back to

1982

20+

More than 20+
years of
experience

Mozon Technologies was founded in 2002 and is considered one of the oldest and most skilled companies in the field of software solutions. Its roots go back to 1982, and due to its long years of continuous and valuable experience, the company has become a leader and pioneer in its field.

Mozon Technologies has dedicated its efforts to developing and improving software. Its focus is on integrating advanced technology with a deep understanding of business needs, which allows it to help customers develop and transform services into solutions.

Mozon has developed many systems and solutions, the most important of which are: Enterprise Resource Planning (ERP) system, Resource Planning system (MRP), Human Resource Management system (MHR), Education Management system (MEDU), Accounting system (MACC).

Mozon offers its services to a variety of sectors, which allows it to serve companies of all sizes and fields. This reinforces its reputation as one of the oldest in the field of developing software into integrated solutions, and its distinction with extensive experience, accurate consulting, and continuous training.

After Mozon has proven to be a reliable partner in more than 7 countries in the Middle East, with a customer base exceeding 1,500 customers who have relied on its expertise over the years, served through its head office in Amman - Jordan, and its representatives in Egypt, the United Arab Emirates, Qatar, and Iraq, the company is committed to maintaining its position as a preferred destination for providing advanced software and a wide range of technological services, all of which are aimed at developing businesses.

Mozon extends its thanks and appreciation to the members of its family, represented by its dedicated employees, whose steadfast commitment has been the cornerstone of its success, and their tireless efforts have been the key to its continued progress. Mozon is keen on its commitment to their growth and enhancing their capabilities and honing their skills to serve the evolving needs of its valued customers in the best way possible.

Our Solutions

SOFTWARE SOLUTIONS

Custom-built programs designed to address customers needs.

BUSINESS SERVICES

A wide range of activities that are provided to businesses to support their operations and help them achieve their goals

IT SOLUTIONS

Tailored to help businesses effectively manage their technology infrastructure, processes, and systems.

To become the leading and preferred company for regional clients in providing information technology business solutions

Our Vision

WHAT SETS US APART?

Specialized staff in

MOZON ERP

Enterprise Resource
Planning

ERP is an integrated and comprehensive system that provides all the tools companies need to be able to plan, manage and control all the various resources and operations from one place, such as financial management, human resources, warehouses, production operations, buying and selling, etc. by covering the various activities of companies. The system automates and provides all companies' needs along with the requirements of official authorities.

Mozone Accounting Software (MACC)

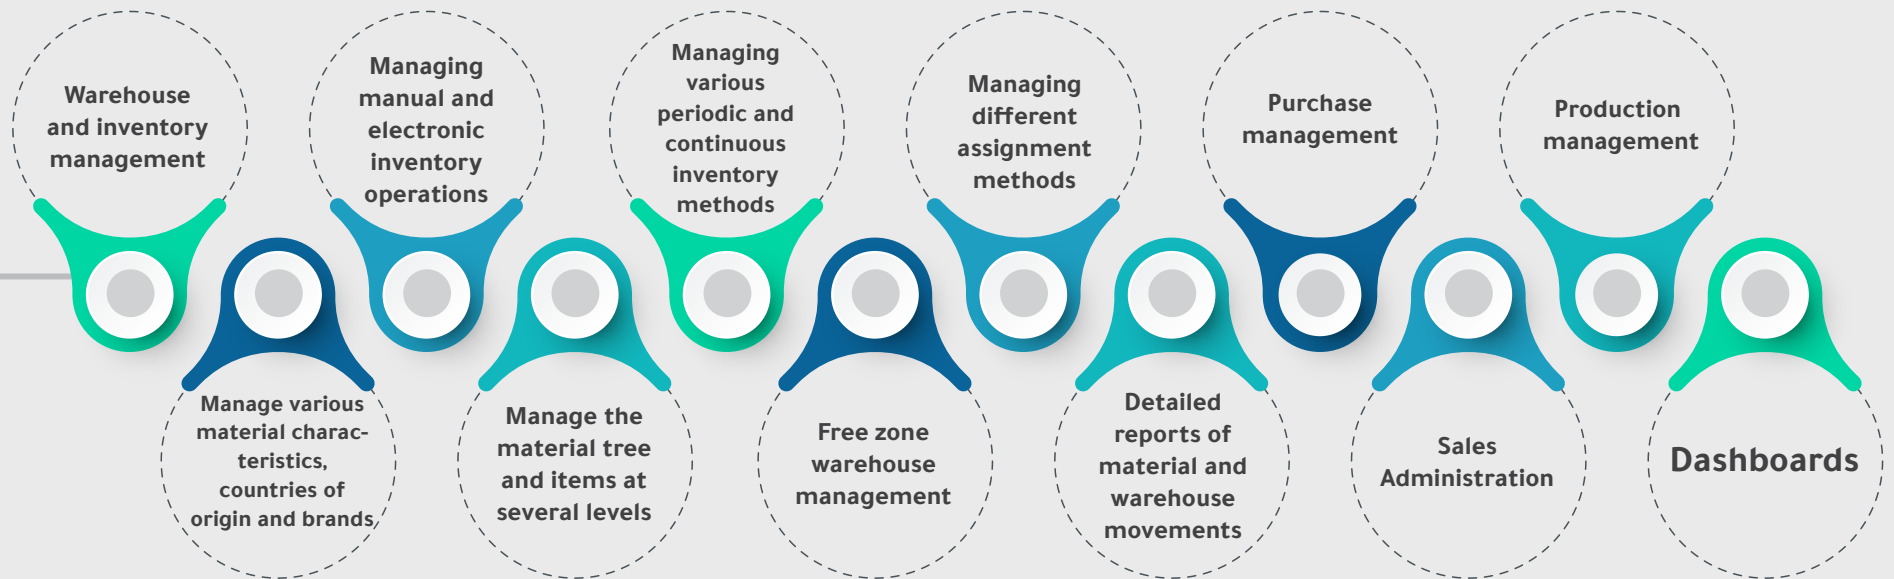

MACC is a specialized system for managing financial transactions in all their forms. The system enables users to extract the financial and legal reports necessary to perform all types of financial analysis required.

Mozon Operations Management (MOM)

Mozon Operations Management System is an integrated system that covers all the requirements of commercial and industrial companies, by providing automatic integration between all operations related to warehouses, sales, purchases and production, while ensuring the workflow in the manner designed by the company by applying user powers, to give the necessary approvals at various stages.

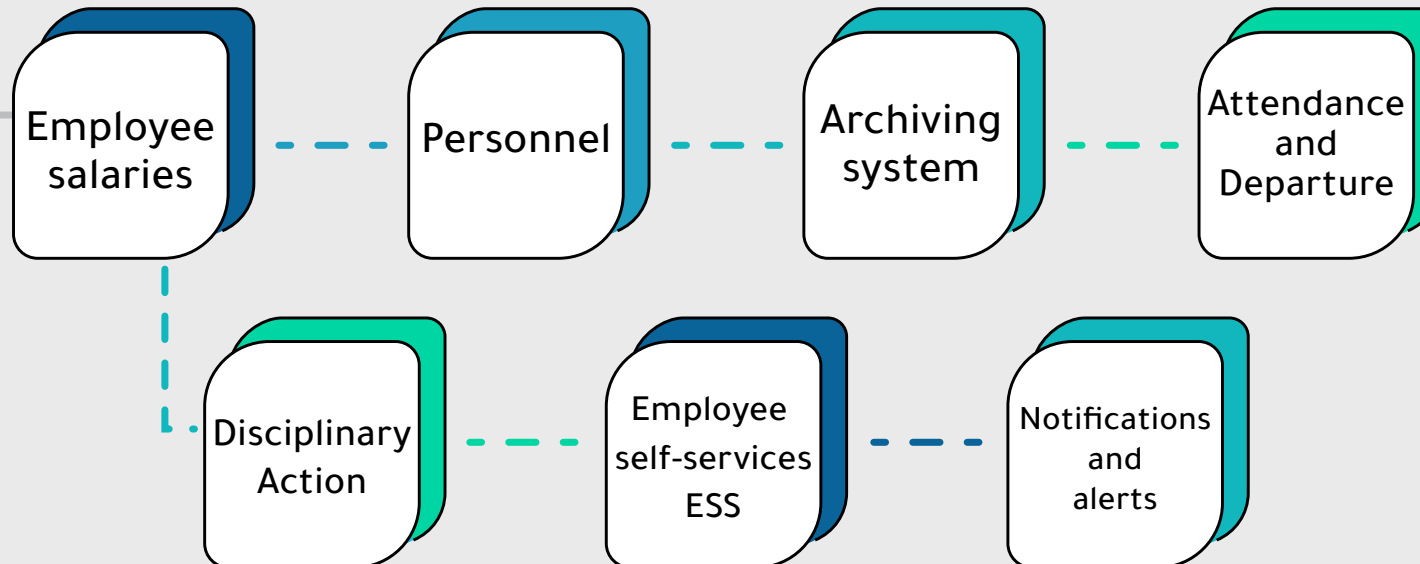

Mozone Human Resources Management (MHR)

The MHR system is specifically designed to increase the efficiency of human resources management and ensure improved productivity of all employees by helping to automate most of the processes related to human capital management.

The system enjoys high ease of use, whether by the Human Resources Department or by employees, using various devices and smartphones, in addition to various Internet browsers.

System Parts

Mozon Invoicing System (MIS)

Mozon Billing System is an accounting system specialized in issuing invoices and the required legal financial reports, in addition to duly sales data and accounting documents.

 **1** Integrated accounting system

 **3** Duly sales data for taxable sales

 **2** Includes all accounting vouchers

 **4** Issuing invoices according to requirements

 **5** A statement of the received and paid tax

Mozone Education System (MEDU)

Mozone Education Management System is a comprehensive and integrated solution, designed to meet the needs of all parties and elements of the educational process, including: school administration, teachers, students, and parents.

Mozone Sales Force Management (MSFM)

The MSFM system provides everything necessary for sales management to control the process of distribution, sale, collection and periodic visits to customers in an automated manner. It also provides the representative with everything necessary to conduct the sales process in the fastest, easiest and most accurate way.

AI Mozn System for Sales and Distribution Management is considered an important and effective tool in sales management, as it enables various users in various roles (managers, representatives, supervisors, warehouse keepers, financiers) to benefit from updated information and make the right decisions based on it.

Managing reps and sales goals

Order Taking

Manage drivers, deliver orders, and transportation costs

Manage customer visits and track delegates

CASH VAN

Collection management

Reports and inquiries

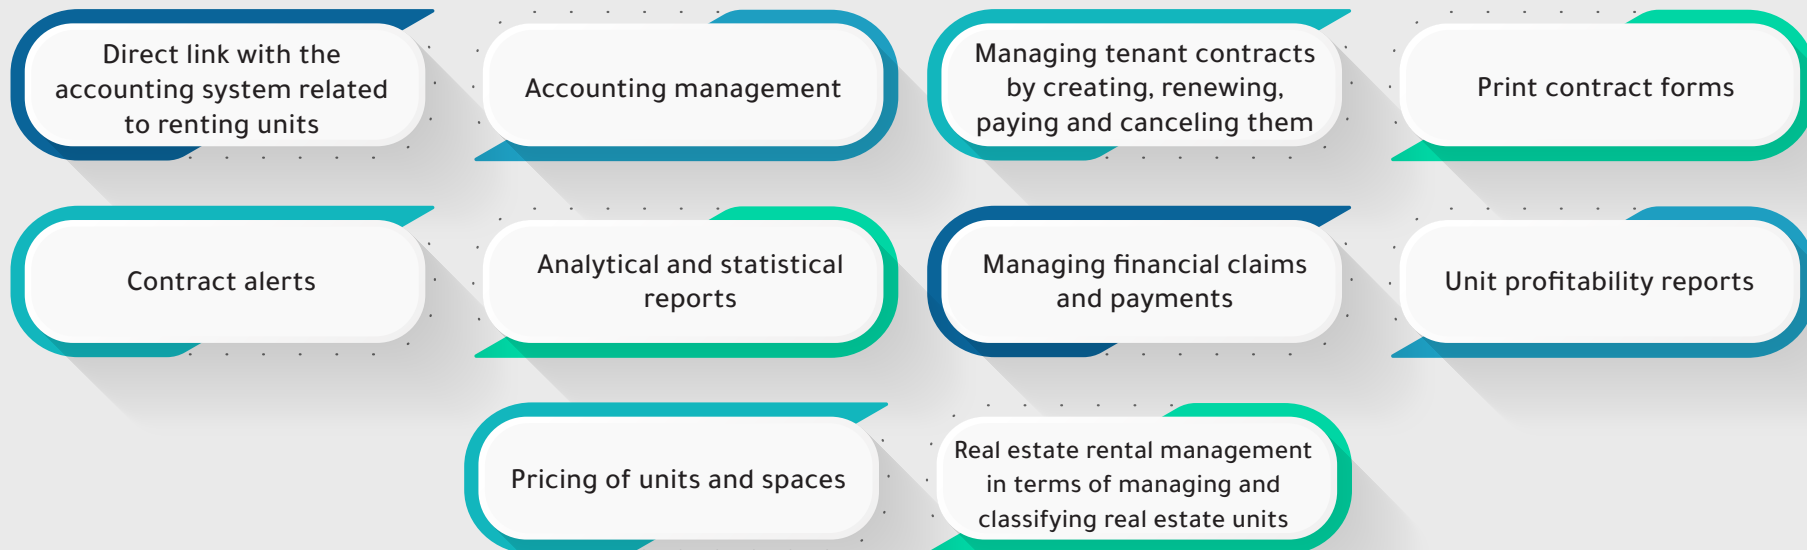

Manage the permissions of delegates and users

Mozon Real-Estate Management (MRM)

The Mozon Real Estate Management System effectively oversees every facet of real estate operations, meticulously arranging and categorizing properties, and establishing prices for both residential and commercial units. It efficiently manages tenant contracts and information, simplifying tasks such as monitoring payments, settlements, and collections, as well as tracking unit outputs and expenses. Subsequently, the system generates comprehensive reports encompassing collections, claims, contracts, vacant units, and other essential data, seamlessly integrating this information directly into the accounting system.

Mozon Contracting Management (MCM)

The MCM system is a comprehensive, integrated solution crafted to boost projects efficiency and streamline the management of subcontractors' records. It empowers users with complete oversight of contracting accounts and construction timelines, contributing directly to overall cost-effectiveness.

Subsequently, the system generates in-depth reports detailing project progress, profitability, and other significant metrics. Moreover, seamless integration with the accounting system enhances efficiency and accuracy in financial tracking and management.

Mozone EagleEye Business Intelligence (EagleEye)

The Mozone EagleEye system is a business intelligence tool designed specifically for decision makers to give them the right information at the right time to make the right decision. The system ensures complete monitoring of the company's key performance indicators (KPIs), and correct follow-up of progress towards achieving goals.

EagleEye dashboards visualize different types of analytical reports through comparisons made between a number of data sets according to different criteria, such as comparison between years, between branches, between projects, between user performance and many other factors.

**Bilingual
(Arabic and
English)**

**Display

Cloud Backup System

The cloud backup system provides the ideal solution for files backup, it automatically stores multiple copies of the files in a secure vault, accessible on demand effortlessly at any time, from any device.

Maintenance & Technical Support Services

01

Free maintenance contract for the first year after purchasing the system

02

Distinguished technical support on site and remotely during working hours

03

Free and comprehensive training for all parts of the system

04

Offering non-expiring SMS packages

05

Accounting consulting services

06

Possibility of modifying the system to meet special needs

07

Continuous and periodic updates and additions to the system

08

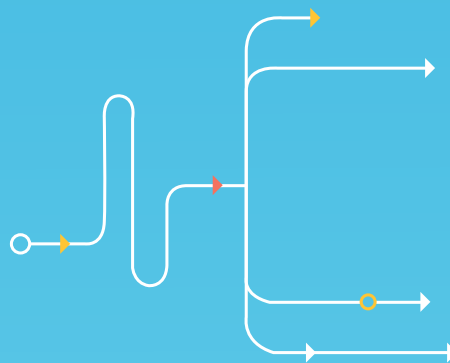

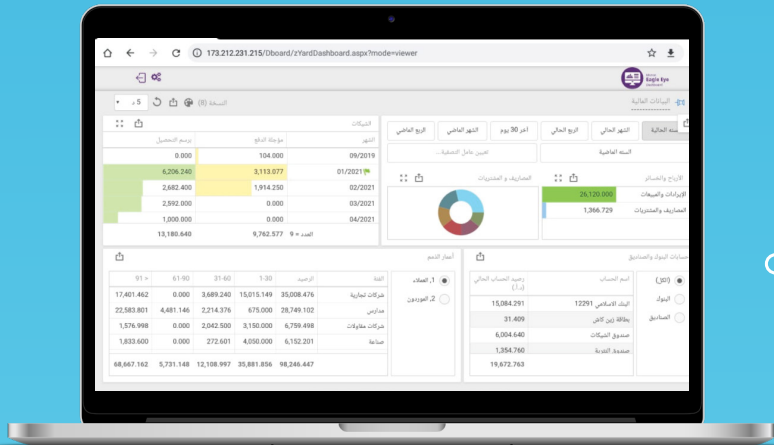

Ensuring the operation of the system and obtaining the required results

09

Providing follow-up tools for customer requests

Api Integrations

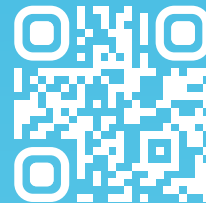

The ERP system makes it easy to integrate with other software programs. It does this by offering various API integrations. Plus, the ERP can automatically link up with popular payment gateways and billing systems, saving time and effort
